### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Hunter(6,356,029B1).

Hunter disclose a method and an apparatus for driving an active type display panel comprising a plurality of display sections(10) each include a series circuit in which a light emitting element(20) and a drive element(22) are connect in series, a plurality of power lines(Vd, 30), a plurality of measurement lines(32), a display controller(16,18), a voltage detector(47,48) and a data correction portion(45, 36, 22) which all function as claimed(see column 4, lines 5-51; column 5, line 38 – column 8, line 11).

3. Claims 2 and 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kimura et al, Numao, Palmer et al, Tsuruoka et al, Fujita et al, Inukai et al, Ishizuki and Sasaki et al are made of record to show various types of active
